

Our Environmental and Ethical Standards

Clothing that doesn't have to cost the earth

July 2020 — our promise

We are committed to fairly and sustainably manufacturing corporate clothing.

Our fair & sustainable tailoring

95% of the polyester used in our collections is made from recycled plastic bottles. All our garments are then crafted in our factories using renewable energy.

That means by wearing Clubclass Corporate Clothing you are preventing plastic bottles reaching our oceans and landfill.

Bottle Sourcing

The bottles are sourced using various socially compliant sources such as: Identified Collection Agencies, Reverse Vending Machines and collection drives at events.

Bottles to Flakes

The bottles are cleaned, washed and crushed to create plastic flakes.

Flakes to fibre

The flakes are melted down and extruded to make fibre.

Fibre to suits

The fibre is processed into fabric then used in Clubclass tailoring.

45

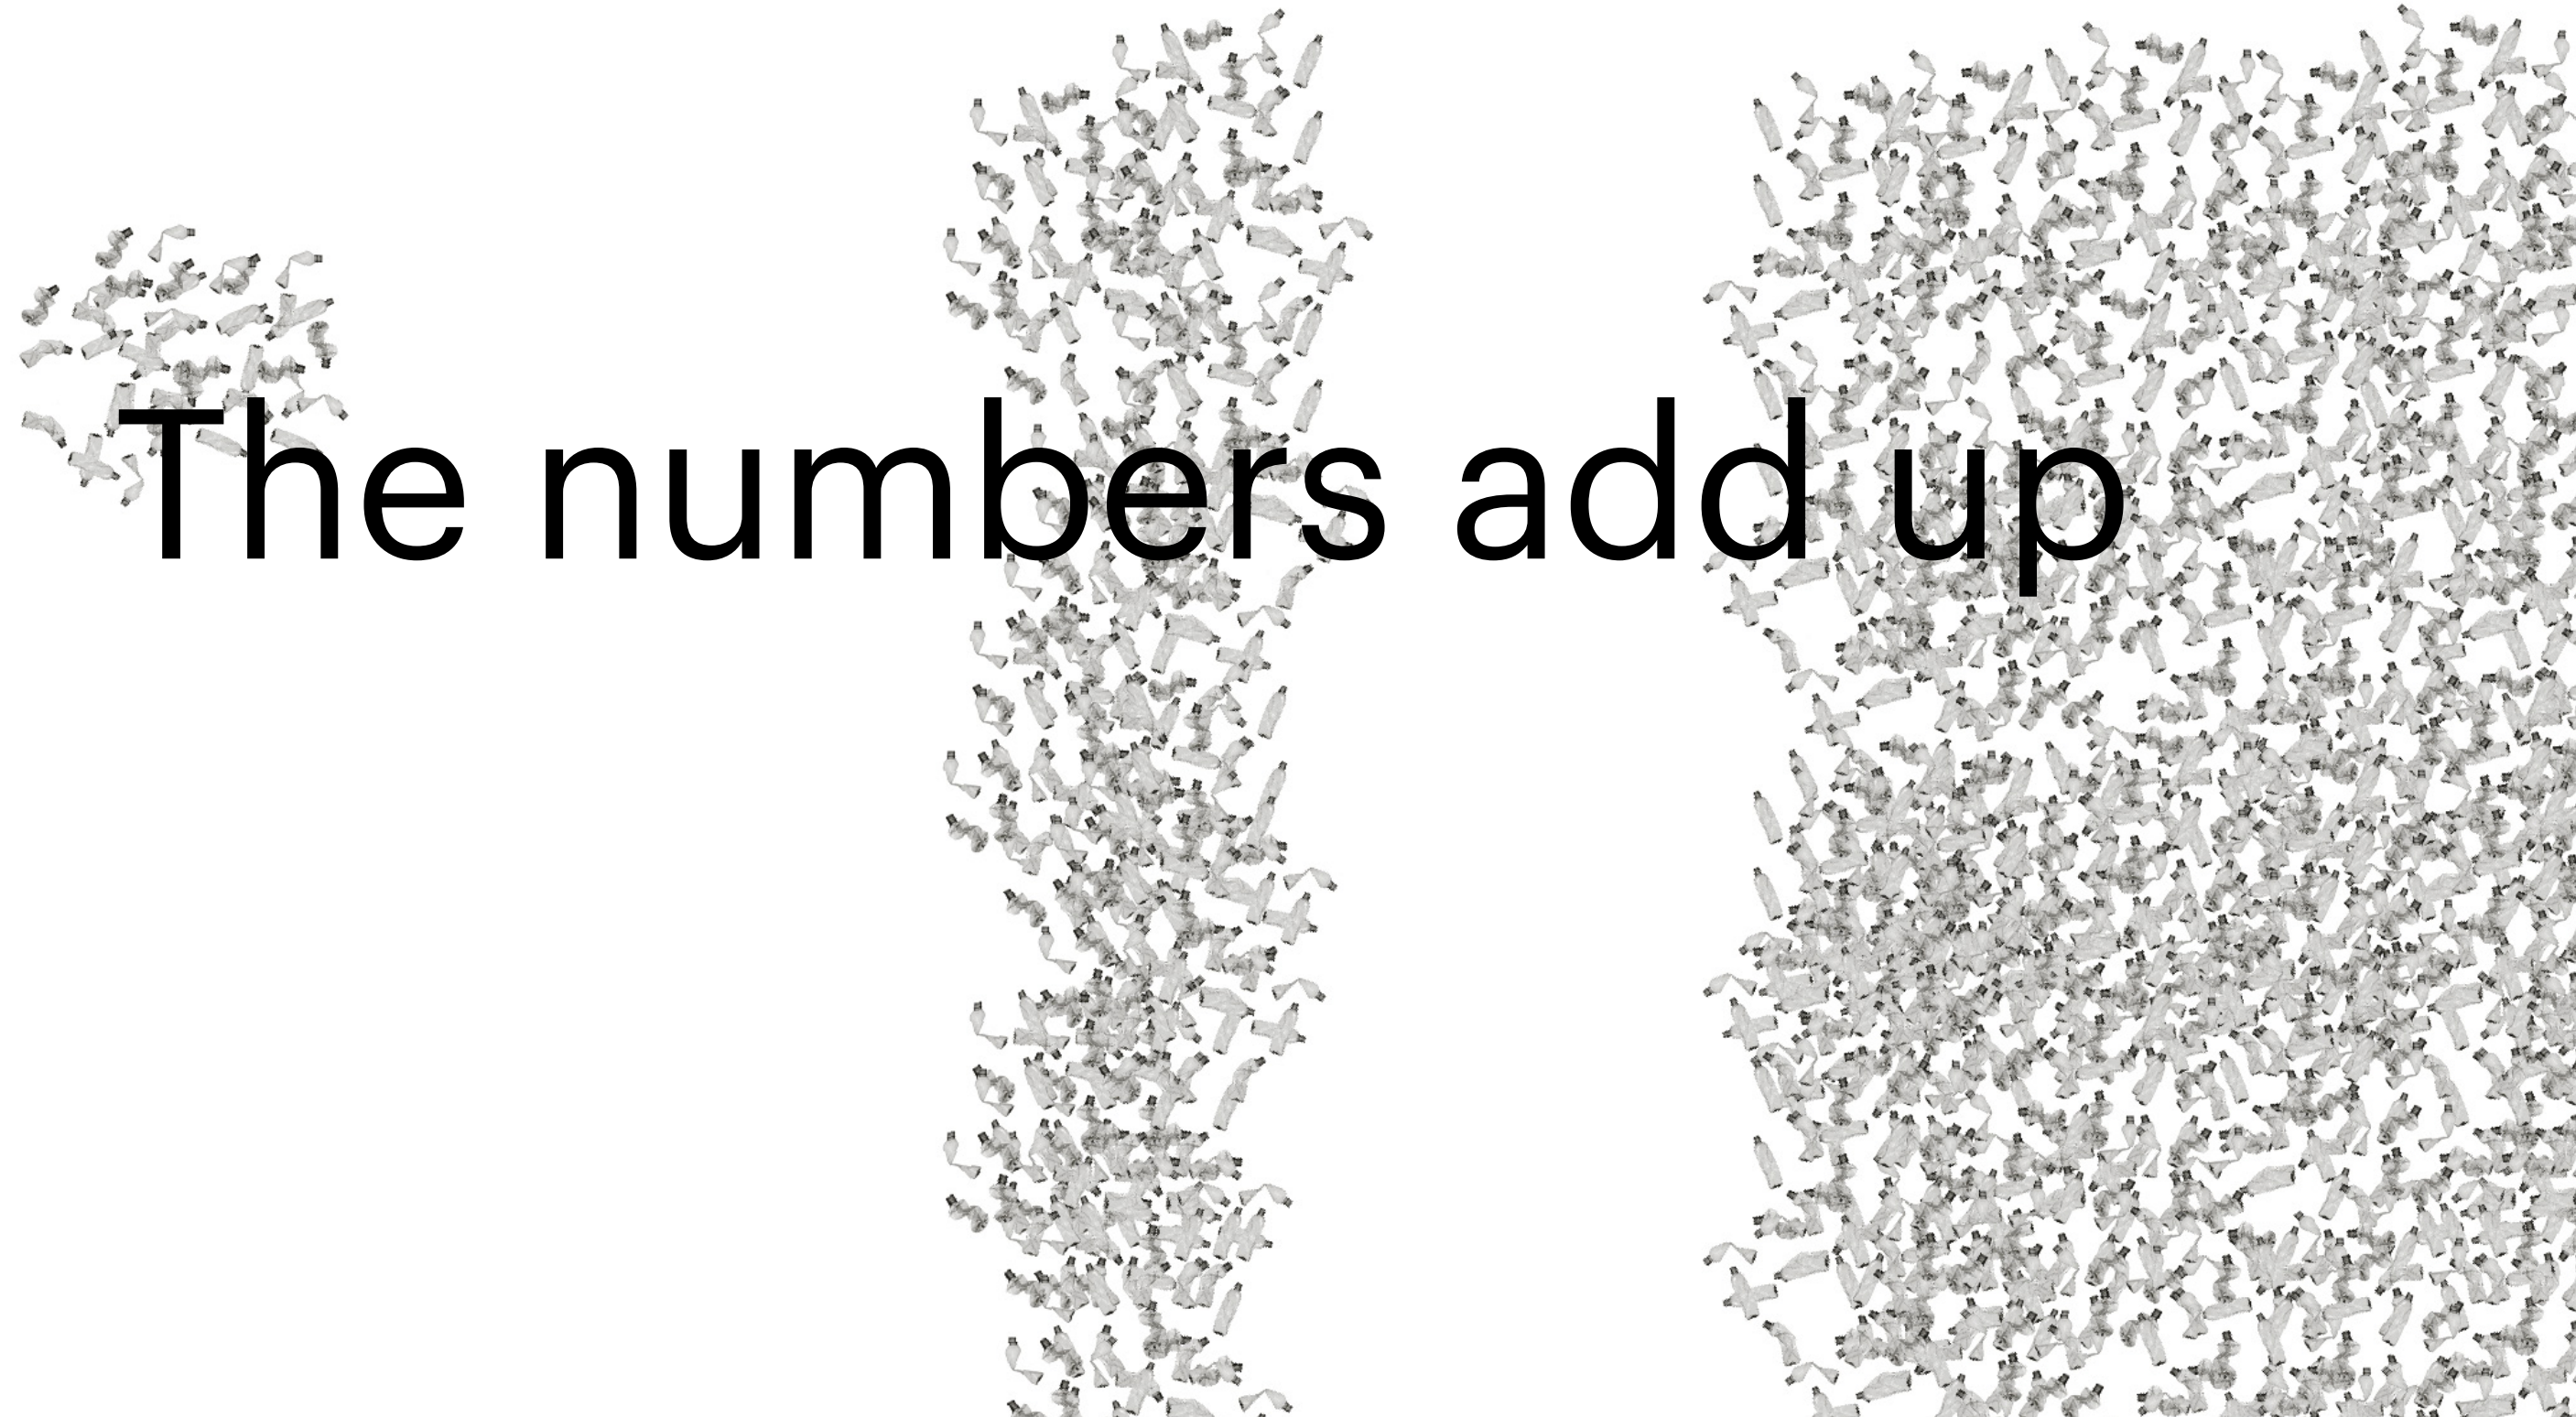

1 suit prevents 45 plastic bottles reaching landfill or our oceans.

675

A team of 15 wearing Clubclass tailoring prevents 675 plastic bottles reaching landfill or our oceans.

6,412,500

Our warehouse holds 150,000 suits. 95% of our collections use recycled polyester. That's 6,412,500 plastic bottles.

The numbers add up

Our core cloth mill is attached to the highest standard of compliance within Oeko-Tex (STEP). We are also Gold Wrap, Sedex and GRS approved.

The Factories
We know who
makes our clothing

We know who makes our clothing

We don't use agencies to manufacture our tailoring. We don't use factories that we haven't meticulously checked. We know who makes our clothing and we also expect the same from the partners we work with from the fabric mills to the button suppliers.

We have our own staff checking the standards in the factories, we also subscribe to SMETA ethical audit compliance.

Our supply chain is industry leading in terms of compliance, sustainability and welfare so you can feel assured that, at Clubclass, we employ only the highest practices.

- Employment is freely chosen
- Working conditions are safe and hygienic
- Child labour is not used
- Wages and Benefits meet the minimum national legal standard
- Working hours comply with national laws
- No discrimination is practiced
- Human and Civil Rights are respected

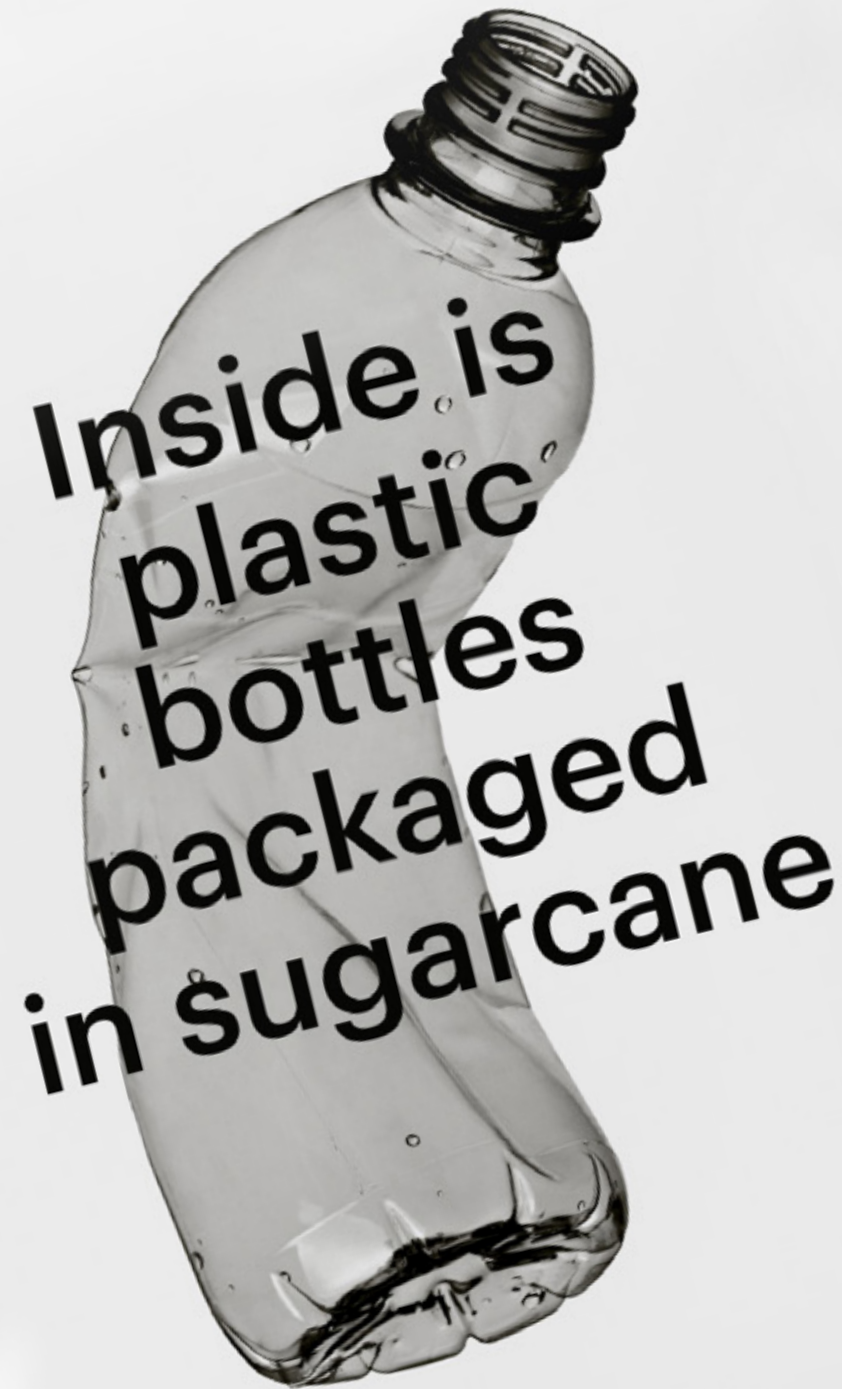

Our sustainable packaging

The Boxes

All of the board used in the production of Clubclass cartons is made from at least 90% recycled fibres and 100% of the carton can be recycled again – they're also fully biodegradable. Any new material used comes from managed softwood forests that are certified as sustainable.

Inside is
plastic
bottles
packaged
in sugarcane

Sugarcane packaging

Our skirts and trousers are carefully folded and packaged in carbon negative packaging. The packaging is produced in the UK using a thermoplastic resin made from sugarcane which is cultivated responsibly. The packaging is 100% renewable, 100% recyclable and 100% sustainable.

Wearing a Clubclass garment you have prevented
reaching landfill or the ocean. Your
garment is lovingly packed up in carbon
negative sugarcane

Less Plastic Less Waste

We have reduced the use of hangers reducing waste. By making this change we have also reduced the weight reducing pollution during transportation.

When we pack your order we select the most appropriate carton. We then pack efficiently, and partner with a leading parcel carrier who commit that every parcel they deliver is carbon neutral.

Building our future

The Lights

Our lights are on motion sensors to preserve energy within the building. Clubclass HQ is fuelled by the solar panels on the roof's building.

Planting Trees

We have planted trees around the office and warehouse to encourage wildlife and to lock up more carbon.

Clubclass Cars

A number of company cars have been updated to be low emission hybrids or electrical vehicles. We have also installed an electrical charging point.

Our Building

Our building is only 3 years old and is built to the highest EU environmental standards. Solar panels are fitted to the roof to supply our electricity and the walls are insulated to the highest standard to ensure energy efficiency throughout the building.

Every detail considered

We're improving all the time

Follow us to keep up to date with new developments in our ongoing commitment to manufacturing fair and sustainable clothing.
