

BECOMING A SUSTAINABLE ØRN

At ØRN we have a long-term commitment to being a truly sustainable business which is why we aim to ensure that every facet of our business has as little impact on the environment as possible, whilst at the same time protecting lives and sustaining livelihoods.

OUR CUSTOMERS

At ØRN, we partner with like-minded organisations who are committed to the same environmental and ethical standards to improve the environment in which we work. Our focus is on developing strong, long-lasting customer relationships.

OUR ETHICAL & RESPONSIBLE WORKING PRACTICES

As a responsible manufacturer, we only partner with ethical and accountable producers who uphold and adhere to globally respected practices.

This includes a zero tolerance to modern slavery and a commitment that our suppliers will not use involuntary, forced or trafficked labour nor hire any employee under the minimum age as established by law.

WORKWEAR MADE BETTER

BECOMING A **SUSTAINABLE ØRN**

In order to fulfil our commitments we have launched '**THE SUSTAINABILITY CONVERSION PROJECT**'. Through this we will evaluate all areas of our operation that impact negatively on the environment.

We have already implemented a number of actions to reduce our impact on the planet and its resources:

We have reduced our carbon footprint by 30% annually, and aim to be carbon neutral by 2030.

100% RECYCLED PACKAGING

All orders are shipped using cartons / bags made from 100% recycled material.

Any cardboard and plastic waste generated within our operation is recycled saving on landfill waste.

50% of our fleet of vehicles delivers low or zero emissions.

In our warehouse we use 100% electric powered MHE equipment and all lighting is low emission motion sensitive LED.

TEXTILE RECYCLING PROGRAMME

Our EarthPro® collection is made using recycled waste plastic and our commitment to sustainability extends well beyond just the manufacturing of the garments. We will recycle any EarthPro® garment returned to us, giving it a new lease of life and helping to reduce the volume of clothing ending up in landfill.
