

ecoviz<sup>®</sup> by Leo Workwear

is a range of high visibility garments made from **recycled** or **sustainable fabrics** which fully conform to the high visibility standard **ISO 20471**

ecoviz<sup>®</sup>

garments are made from **recycled polyester** from either recycled post-customer clothing or from **recycled plastic bottles**

The range was **established** with a line of **polos/t-shirts** in 2019 and has grown to **23 products** in 2021

Our orders for all **ecoviz<sup>®</sup>** to date have resulted in:

C02 saving the equivalent of planting **27k+ trees**

An energy saving to the equivalent of powering a family home for **832,000 hours**

saved **100M+** litres of **water**

Recycled **1.3M+** plastic bottles

Garments made from **recycled post-customer clothing** use **50%** less **energy** and **C02**

compared to using virgin oil-derived polyester

## swing tickets

have been consolidated  
from 4 to 1,  
saving a huge amount  
of cardboard

All Leo **cardboard boxes** are made from recycled cardboard and are **fully recyclable**

## ecoviz<sup>®</sup>

pb range has the additional benefit of using **bamboo fabric** alongside **recycled polyester**, replacing cotton

All **ecoviz** garments are **packaged in recycled bags**

These bags are also **oxo-biodegradable** and so will break down should they end up in landfill

All **plastic tags** have been replaced by **sustainable jute string**
