MASCOT® WORKWEAR A WORLD OF STYLES

A World of Styles

Welcome to a universe of possibilities to put together the perfect workwear solution for your company. This catalogue offers a large selection of T-shirts, polo shirts, sweatshirts and other tops that you can combine whichever way you like to match your needs and wishes. For inspiration, you will also find examples from the rest of the assortment's 600 products within workwear, safety clothing, safety footwear and accessories.

One-stop-shop

Corporate Identity

4

Your colours

**Features for all
employees**

**Products for every
need**

You only need one supplier for the entire workwear solution. Save time by getting clothes, shoes and accessories from one supplier that also offers excellent security of supply and fast delivery.

Strengthen your brand with a workwear solution that allows you to appear professional in the eyes of the customer. Professional workwear fosters a common identity among employees as well as a sense of pride in being part of the company.

Usually, your company will have a preferred colour for branding. MASCOT has T-shirts and polo shirts in up to 23 different colours per product. Print and embroidery in your colours can also be added to the clothing – which MASCOT handles quickly and efficiently as part of the order.

The selection of T-shirts, polo shirts, sweatshirts and other tops is so extensive because the requirements of your employees are just as extensive. This is why there are different fits within each product category.

The products are divided into different categories according to how much you can expect from the product: PREMIUM, BASIC and MACMICHAEL. PREMIUM means high quality products, both in terms of materials and features, that can be used again and again. BASIC refers to everyday products in a very reasonable quality. MACMICHAEL refers to products with extremely competitive pricing.

Well-documented manufacturing conditions

We ensure that you can choose any product from MASCOT's range and wear it with a clear conscience. The manufacturing conditions have been thoroughly inspected and documented by independent international bodies.

The vast majority of MASCOT's range is manufactured in our own factories, which are certified according to SA 8000. SA 8000 is an internationally recognised standard in social responsibility, and it also sets requirements for sub-contractors. We consider SA 8000 to be the standard that sets the most stringent requirements for good, ethical manufacturing conditions.

The remaining products are manufactured in reputable factories with high levels of expertise within the product group. The factories with which MASCOT has partnership agreements are subject to annual inspections by SGS, an independent third party, which inspects everything from working conditions and job satisfaction to evacuation routes and environmental control.

With SA 8000, MASCOT can document that we have

an effective management system, which among other things, checks the conditions of the employees of subcontractors

the right to organise

a good working environment, adapted to local conditions

no forced labour

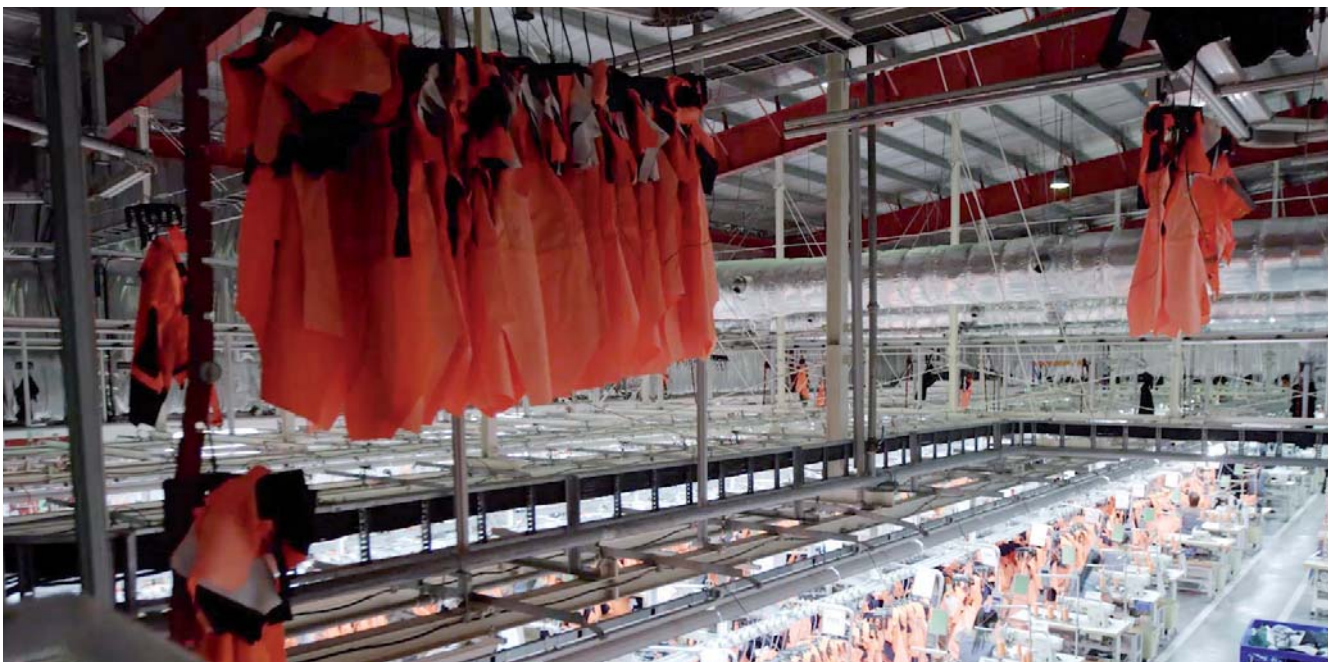

reasonable working hours and wages

no discrimination

no child labour

Quality in ordering, delivery and service

MASCOT is not just a supplier of quality workwear and safety footwear. We also ensure thoroughly tested solutions all the way through ordering, delivery and service. See a selection of the options here and contact us to discuss how we can give you a streamlined, optimum workwear solution.

TESTED TO WORK & YOUR GUARANTEE

We place very high demands - on ourselves. TESTED TO WORK is not just a good slogan - it is also a way of working. All of MASCOT's Workwear has been tested numerous times before you get the chance to buy it. In terms of durability, safety and comfort, only the best is good enough for you!

All our products have a 2 year guarantee on all zips and triple stitched seams. The product will be replaced or repaired if the defect occurs within two years of purchase*.

** Guarantee applies only to ordinary wear and tear and if the fabric has not been damaged.*

146

NUMEROUS COLOUR COMBINATIONS, SIZES & LENGTHS

The strength of a wide range - A range that can dress from head to toe and from inner layer to out. Our assortment offers a variety of functions and features – so whomever the wearer, whatever their job, function or requirements, we have something for everyone. More than 600 different products in up to 23 different colours and up to 63 different sizes per product.

QUALITY ASSURED

ISO 9001:2008 is proof that MASCOT consistently provides products that meet customer and applicable statutory and regulatory requirements, whilst processes and procedures are adhered to throughout the company. MASCOT has its own laboratories in Denmark and Vietnam where we continuously and extensively analyse fabrics.

EXCELLENT DELIVERY PERFORMANCE

Your distributor can order any one of the 20,000 item numbers available in the MASCOT range. With high stock quantities items can be delivered very quickly. Your distributor can provide advice to help you find the most suitable types of materials and combination possibilities for your company and work situation.

CUSTOMISATION

MASCOT has a wide range in many sizes, but we are aware that there may be individual needs that aren't covered within the standard range. Therefore, our customers have the possibility to have items customised, for example, an extra pocket, reflectors on the legs, or something else. MASCOT also has its own printing room and embroidery department, located under the same roof as our warehouse, providing great flexibility and efficiency in the printing / embroidering of individual logos.

The perfect advertisement

Show your professional pride through print and embroidery with your company name and logo

148

MASCOT workwear is designed to provide enough space to have your company name printed or embroidered on the clothing. Usually on the chest, on the back and down the leg. But there is a wealth of other options.

Photography by Marco Joe Fazio - www.marcojoe.fazio.com on behalf of the Stone Theatre - www.stonetheatre.com/

You can use many types of printing on MASCOT's workwear. On a few types of fabric (e.g. fleece), we recommend embroidery instead. Take advantage of the countless options to profile your company by printing and embroidering your workwear. Find out more about the options at MASCOT or from your local distributor.

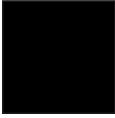

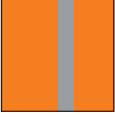

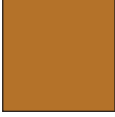

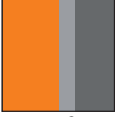

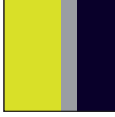

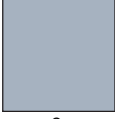

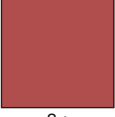

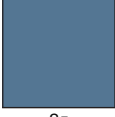

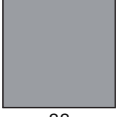

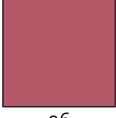

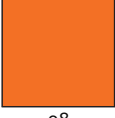

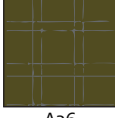

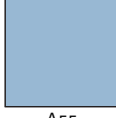

Corporate Identity

- promote your company with your company name and logo

Your name and logo on your workwear is the best advertisement for your company and for the product/trade that you provide. It also gives your employees a sense of belonging and pride in being part of the organisation. Company name and logo promotes your corporate identity.

Single jersey

Single jersey is a single-layer knitted product that, first and foremost, is very light. Unlike Interlock, it only has one layer (and thus a front and back side) and therefore the thinnest possible structure, making it particularly breathable.

Interlock

When you choose a product with interlock knitting, you get an even, soft material that is ideal for printing. It is a flat knit that is elastic and well-suited to products that are in contact with your body. Interlock is generally used for undergarments and other products that touch the skin as the interlock knitting method results in a product that is just as soft on both sides.

Combed cotton

Combed cotton is a specially treated high-quality cotton. This type of yarn is exclusively made from long cotton fibres, and results in a stronger and more durable product that continues to look good without pilling. Combed cotton is an attractive, quality cotton with a smooth and soft surface.

Piqué

The most common piqué knit products are polo shirts. Piqué is a smoothly knitted product, where a few stitches are double knitted. This results in an attractive and exclusive surface with a honeycombed appearance. Products in piqué are incredibly comfortable to wear since they are light, soft and extremely breathable.

Anti-pilling treatment

Some textiles have a tendency to develop lint and fuzz during use. This lint accumulates on the surface of the fabric, known as pilling, and results in the clothing having a washed and worn appearance. MASCOT's anti-pilling treatment prevents the formation of lint and ensures that your clothing remains smart and presentable.

Pictograms

Classic fit

Select products with the Classic Fit symbol if you are looking for products with extra width. The products with Classic Fit are the most spacious in the MASCOT range.

Modern fit

Most of MASCOT models have a normal, comfortable workwear fit. Recently, we have experienced a higher demand for a slimmer fit. Look for this symbol, if you require clothing to sit a little closer to the body.

Slim fit

If you are fond of products with a body conscious fit, choose Slim Fit products. The clothing fits close to the body and moves with you.

Lady fit

Products with this symbol are designed according to MASCOT's women's fit. The clothing gives you a comfortable and thoroughly tested fit, with great freedom of movement.

Ergonomic fit

All of MASCOT's clothes are, of course, designed for movement. But if you have a particular need for clothing that supports, assists and just plain fits, in all body positions, then go for the ergonomic fit.

Moisture wicking

Most fabrics can absorb sweat, but some materials can do more than that – particularly, transport sweat away from your body so you do not experience wet and cold to your innermost layer. A moisture-wicking innermost layer is crucial.

Water-repellent

Clothes carrying this symbol are made of waterproof material. However, it is not possible to put tape on the back of the seams of certain fabrics. Therefore the product cannot be classified as being entirely 100% waterproof, just water-repellent.

Breathable

Breathability in waterproof clothing is especially important when you sweat while working in cold environments. If you do not get rid of the moisture, there is a great risk that your wet clothes will get cold and you will freeze as a result.

Windproof

When your clothing is windproof you hold heat more easily. Choose products with this symbol when you don't want the wind to bother your everyday comfort.

Reflective

Small reflective strips on your clothing can be crucial to your safety. Regardless of where you work, you will occasionally be near traffic. In this environment, reflectivity increases your chance of being seen.

Certifications

UV Standard 801

The standard for protection against UV rays. The standard specifies how well the workwear provides user protection from the sun's UV rays. A protection factor of 80 is the highest a material can achieve in the test.

EN ISO 20471

EN ISO 20471

High-visibility warning clothing for professional use
X: Indicates product's overall class, depending on the area of the fluorescent fabric and the area of reflective tape.

EN 343

Protective clothing - Protection against rain
Top digit: Resistance to water permeability. Class 1-3 (3 is highest class).
Bottom digit: Water vapor permeability. Class 1-3 (3 is highest class).

EN 471

High-visibility warning clothing for professional use
X: Indicates product's overall class, depending on the area of the fluorescent fabric and the area of reflective tape.
Y: Indicates reflective strips' ability to reflect light. There are two classes; 1 or 2, where 2 is the highest. All MASCOT reflective strips are Class 2.

Oeko-Tex standard 100

Confidence in textiles. Tested for harmful substances.

Fabrics and textile brands

203 - 70% polyester/30% lyocell (TENCEL®)

Cooling, soft and durable workwear

Imagine your workwear having the usual durability and strong quality whilst being cool and soft. This is the feeling you'll have from our fabric in quality 203, where TENCEL® is used. TENCEL® is a natural, sustainable fibre derived from trees. When used in workwear, TENCEL® is cooling and extremely moisture wicking. MASCOT is one of the first to use TENCEL® in workwear, but it has been used for many years in clothing for elite athletes. Mixed with polyester, TENCEL® provides a very robust fabric.

Used as lining

Unique insulation

PrimaLoft® is a unique type of insulation that keeps you warm even though the material itself is very light weight. It is breathable and effectively wicks moisture away, so you don't become cold and wet. PrimaLoft® takes up almost no space when it is compressed for storage or when used as an inner layer. MASCOT uses PrimaLoft® Black Insulation Eco, which is made of at least 60% recycled material.

Quality: 11 and 12 -
100% polyamide (CORDURA®, Teflon® treated)

CORDURA® fabric for everyday wear and tear

High durability is crucial when you are working at a fast pace. Holster pockets and ruler pockets have to stand the pressure when tools, nails and screws are taken in and out of the pockets countless times during the day. MASCOT ensures durability by using lots of CORDURA® fabric on all the exposed places, such as kneepad pockets, holster pockets and ruler pockets. CORDURA® fabric is in fact seven times stronger than cotton. We use both 1000D CORDURA® (quality 11) and the lighter 500D CORDURA® (quality 12).

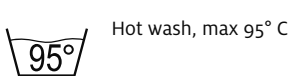

Quality: 826 - 95% polyester/5% elastane, (MASCODRY®)

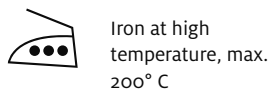

Removal of moisture effectively

You give off a lot of heat and moisture when you move around. Preferably, moisture should be dissipated from the body so you don't get the feeling of being soaked, as this can easily lead to you becoming cold. The right clothes will help you remain comfortable even with high activity levels, as they quickly lead moisture away from the body. MASCOT has clothing made from MASCODRY®, which can handle this for you so you can concentrate on work instead.
