INNOVATION ALIGNED WITH THE UNITED NATIONS' SUSTAINABLE DEVELOPMENT GOALS

WEARECO IS A SUSTAINABLE PHILOSOPHY DEVELOPED AROUND THREE PILLARS: ENVIRONMENT, PRODUCT AND PEOPLE.

RESPONSIBLE USE AND PRODUCTION

Environmental protection encompasses aspects of production; the choice of materials, the management of energy resources and the control of waste production.

HEALTH AND WELLNESS

The health of workers is a fundamental value of Base Protection. The company mission is to produce anti-fatigue, comfortable and light safety shoes. The goal is to improve the life of the worker during professional activities as well as outside work. The result? A more rested worker who is more alert and responsive to dangerous situations. More comfort, more safety.

DIGNIFIED WORK AND ECONOMIC GROWTH

Base Protection promotes a healthy and stimulating work environment, through corporate management encouraging harmony between people and an atmosphere of collaboration, exchange and respect which contributes to the success of the company.

SUSTAINABLE PERFORMANCE

Sustainability index is obtained by summing the following parameters::

- % of recycled materials
- % of materials with lower CO2 emissions
- % of raw material obtained from biomass

*ALL WEARECO MODELS ARE
DESIGNED TO OFFER THE
HIGHEST STANDARDS OF
SAFETY AND COMFORT.*

*THE SELECTED SUSTAINABLE
MATERIALS GUARANTEE
RESISTANCE AND DURABILITY
OVER TIME.*

PATENTS AND TECHNOLOGIES

AirTech + tpu-skin®

THE REAL RELAXING SOLE

Base Protection's patented technology reduces the hard, compact thickness of each thread to a revolutionary and unprecedented value. For you, this means that there is greater elasticity and more cushioning while the anti-fatigue effect reduces your effort and saves your energy.

Anti-fatigue effect and high flexibility of the shoe reducing foot effort and allowing energy saving.

Dry'n Air®

DRY FOOT SYSTEM

Base Protection patented technology permitting air circulation in the shoe. It can be integrated into the sole (Platinum Line) or into the removable anatomical insole.

SlimCap

NON METALLIC TOE

Building upon a strong history of innovation, Base Protection's non-metallic toe cap surpasses metal toe caps in every way. Lighter, heat-insulating, more elastic and non-magnetic, it has a thickness of 6.5 mm - the lowest on the market. This means more space and comfort for you as the protective band is perfectly shaped and secured to the tip. And more peace of mind, as the risk of accidental detachment and subsequent pressure on your foot is prevented. It can withstand the strongest mechanical stresses required by the EN ISO 20345 and EN 22568 standards.

The protective band supplied is perfectly shaped to the tip: the risk of accidental detachment and consequent pressure and pain on the fingers are excluded. It is able to withstand the strongest mechanical stresses required by EN ISO 20345 and EN 22568 standards.

SmellStop

ANTI-ODOUR LINING

Anti-odour lining preventing proliferation of microorganisms responsible for bad odours and mycoses. With SmellStop the foot is in good health.

Antibacterial according to EN ISO 20743:2013 standard. Treatment carried out with the biocide Zinc pyrithione (CAS-No. 13463-41-7) of Product Type PT 09 and compliant with regulation 528/2012/EU..
