Reflective Effects

Get ready for work.

PROTECTION & COMFORT

METAL-FREE, WATERPROOF BOOT WITH INTERNAL METATARSAL PROTECTION

REFLECTIVE EFFECTS

Reflective panels help improve workforce safety in dark environments.

BLACK SMOOTH WATER RESISTANT LEATHER

Durable, comfortable and easy to clean and maintain. Full waterproof protection.

HARDWEARING DUAL DENSITY PU/HRO RUBBER SOLE

Slip Resistant to the SR rating and Antistatic, a popular hardwearing rubber sole with those working in a number of different sectors.

COMFORT FOOTBED

Designed to maximise comfort for the wearer.

WATERPROOF MEMBRANE LINING

The fully-waterproof lining will keep the wearer comfortable and dry in demanding weather conditions. Now with a new red mesh update.

PADDED TONGUE WITH INTERNAL 'PORON XRD' METATARSAL PROTECTION

Flexible under normal conditions, Poron® XRD foam instantly hardens on any sudden high impact - creating a protective shield that absorbs the impact, and yet remains comfortable and non-restrictive as it returns to its resting state.

TPU SCUFF CAP

TPU scuff cap provides additional protection against wear and tear, especially for wearers who may crouch to carry out their work.

200 JOULES COMPOSITE TOE CAP

This composite material absorbs impact, protecting the wearer better than steel, which dents inwards and can lead to fractures.

With over half a million workplace injuries in the UK each year, and foot injuries being a contributing factor, it is essential for employers and employees to make informed decisions about footwear protection.

Foot injuries, in particular, can be costly, often resulting in claims worth several thousand pounds, along with many hidden and uninsured costs.

Don't wait for an injury to highlight the need for better foot protection—prevent it at minimal cost with Airlite boots!

Exclusively designed and supplied by HeathBrook, this footwear range demonstrates our commitment to meeting the challenges of working in public environments with specific safety and security demands.

Specifically designed to meet the demanding requirements of airport environments.
