

Endurance

Tailored for demanding environments

There are 2 collections within the Endurance range both designed for everyday use, men's & ladies performance suits engineered to withstand harder wear. Choose from a range of styles designed to suit your team.

The Endurance P.W. collection is made using polyester and wool. The wool content within the fabric is a natural fibre used for its durability, breathability, odour resistant qualities, and wrinkle resistance, making the collection an ideal choice for tailored clothing. Also known as "elastic recovery," the wool content has a springiness that makes for good wrinkle resistance.

The Endurance P.V. collection substitutes wool for viscose for a more budget friendly alternative but with no lack of performance. The polyester/viscose blend, ensures your suit will be versatile and easy to wear. The polyester adds durability and wrinkle-resistance, while the viscose gives the fabric a gorgeous drape and a silky hand-feel.

Endurance Poly Wool

Colours Available –

Black
Navy
Charcoal

Composition –

70 % Recycled Polyester
30 % Wool

Worn everyday by sectors such as –

Bus, Rail and Road

Office and Retail

Events and Promotion

Ceremonial

Facilities Management

People & Planet

We don't just claim sustainability, we certify it. We proudly partner with Carbon Neutral Britain, Wrap, Sedex and Oeko Step to ensure our products, and our processes, support both people and planet.

As we work to drive emissions to zero, we believe that we should be held accountable for our environmental impact. So until we reach our goal of zero, we're taxing ourselves for the carbon we do emit, and investing in carbon offsets to fund projects that neutralize our footprint.

This goes towards funding projects not just on emissions, but also their wider impact – providing secondary benefits such as education, employment, clean water, and a positive impact on the local wildlife and ecology.

Turning recycled plastic into tailoring

The Recycled Polyester fibre is made from 100% PET Plastic Bottles and is Certified by the Global Recycled Standard and is produced in a Green Mill powered by Bio Fuel.

The bottles are sourced using various socially compliant sources such as Identified Collection Agencies, Reverse Vending Machines and collection drives at events. The bottles are cleaned, washed and crushed to create plastic flakes. The flakes are melted down and extruded to make fibre.

We don't use agencies to manufacture our tailoring. We don't use factories that we haven't meticulously checked. We know who makes our clothing and we also expect the same from the partners we work with from the fabric mills to the button suppliers. Our supply chain is industry leading in terms of compliance, sustainability and welfare so you can feel assured that we only work to the highest practices.

Tailored to last a lifetime

All garments are a combination of technical excellence and fine craftsmanship expertise that sets them apart from high street suits

The Collar

If you open up the collar you will notice an extra tape that is used to help stiffen the collar.

The Buttons

Dyed through buttons that look good for years without fade.

The Lapel

The lapels are carefully crafted and rolled to give shape and depth for a clean crisp sharp suit.

The Canvas

The canvas creates a structured look but it is also durable and flexible allowing the jacket to naturally conform to your body shape.

The Pockets

The pockets are precision made to look good and stay in shape for the life of the garment.

French Bearer

Gives a "clean" look when fastened and stays in shape through long wear.

Easy Waistband

We have trousers available with a discreet elastic insert to give waist ease while retaining a formal appearance.

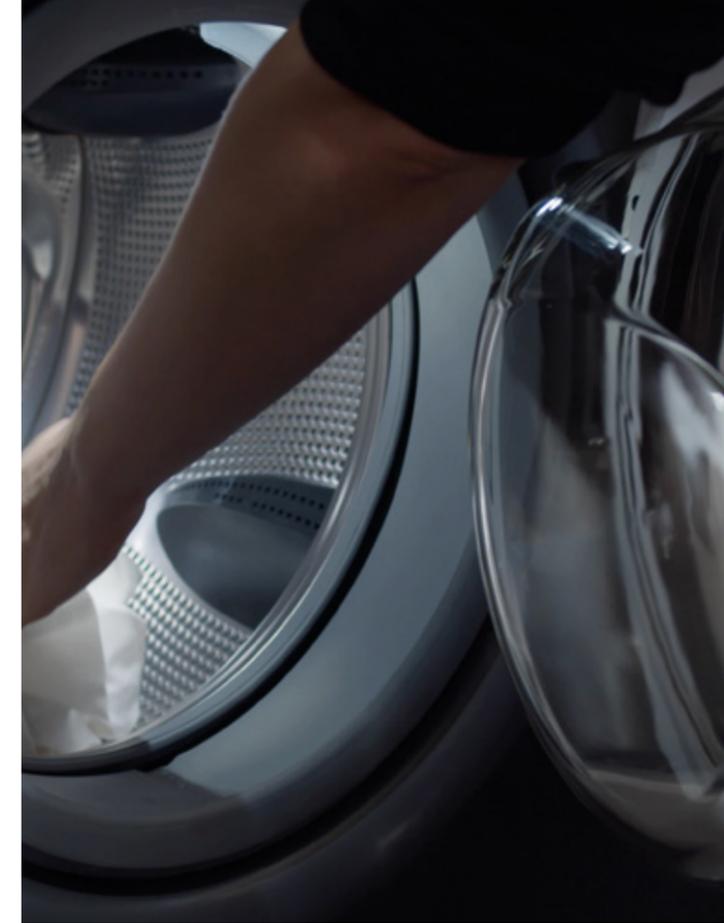

Branded Zips

Branded zips are used for industry leading reliability.

Every garment is developed ultimately to domestic wash performance

We are incredibly experienced and passionate through continually testing and trialling to ensure that your tailoring will last longer.

Every garment is developed ultimately to domestic wash performance from the blended fabric through to the engineering of the product.

Bespoke Tailoring

A uniform is more than a piece of clothing. It is a sense of belonging, bringing people together and harmonising teams.

If you are looking for a completely bespoke look, we understand the dynamics of your brief from the fabric, raw materials, design, sampling, manufacturing, environmental impacts and quality assurance through to the necessity of timely logistics.

We like to think we provide an intelligent solution to textile sourcing. We are pro-active and will regularly provide developments in the form of fabrics and garments for your review.

We don't use agencies to manufacture our tailoring. We don't use factories that we haven't meticulously checked. We know who makes our clothing and we also expect the same from the partners we work with from the fabric mills to the button suppliers.

Our supply chain is industry leading in terms of compliance, sustainability and welfare so you can feel assured that we only work to the highest practices.

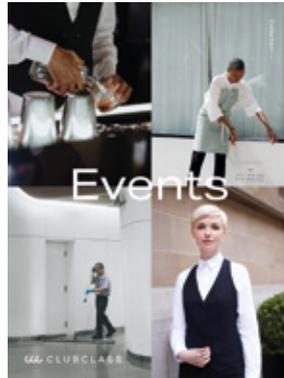

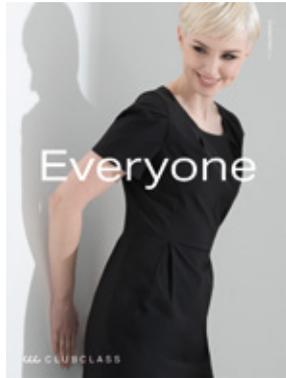

What made you choose Clubclass as your bespoke tailoring manufacturer?

Molly Hopkins,
Director of Corporate Wear at Gresham Blake London

“ When we are designing uniforms for large hotel groups, often in-house uniform launderability is a key point in their brief. With Gresham Blake's reputation of being a high end bespoke tailoring brand, it is important to us that we maintain the quality and structure of our tailored garments. Clubclass are experts in producing long lasting, quality garments that still look amazing after being washed and hung to dry.

Our niche is offering bespoke corporate wear designs including original micro-poly jacquards and printed lining designs. Mixing these bespoke fabrics with the range of hardwearing, sustainable and ethical fabrics from Clubclass has been a winning combination for our clients.”
