

HEATHBROOK'S REFUELLING RANGE

Keeping refuellers safe and comfortable in all weathers.

 **HeathBrook**[®]
Workwear Solutions

FOR YOUR REFUELLING CREW

MEETING AVIATION NEEDS

With over 20 years of experience in aviation workwear, HeathBrook understands the unique demands placed on refuelling teams. Crews require garments that balance visibility, protection, and comfort - often in challenging outdoor conditions. Our flame-retardant and anti-static hi-vis clothing ensures compliance with industry regulations while keeping operatives safe, visible, and able to perform their role effectively in all weathers.

REFUELLING TEAM REQUIREMENTS

Every refuelling environment brings risks - from exposure to fuel vapours through to adverse weather. That is why our range includes FR/AS jackets, anoraks, salopettes, and waterproof outerwear, are all designed for protection against fire, static, and the elements. With breathable fabrics, detachable liners, and designs built for layering, our garments give refuelling crews the flexibility to stay comfortable while maintaining full compliance and operational safety.

THE HEATHBROOK SERVICE

As specialists in both uniform and PPE, HeathBrook provides a complete solution from one trusted source. This means consistent supply, simplified ordering, and reduced deliveries to help manage your carbon footprint. More importantly, it gives your refuelling teams confidence that their workwear and PPE are not only compliant but also durable, practical, and designed with their needs in mind. We combine quality and service with cost efficiencies, enabling you to reinvest savings back into your operations.
