

HeathBrook® SMARTRECYCLING

⚡ 350,000 TONNES WORTH OF TEXTILES ARE SENT TO LANDFILL EACH YEAR, AND 26.2M TONNES OF CO2 IS PRODUCED DUE TO TEXTILES EACH YEAR, IN THE UK ALONE! LET'S MAKE A CHANGE. ⚡

WHERE DO MY TEXTILES END UP?

The recycling process separates materials from garments take, so that the amount recycled is maximised. Depending on the fibres and materials recycled, your uniform may end up as:

- **New clothes!** - depending on the garment you purchase the uniform can be used to create new clothes.
- **Polyester chips** - or as final option, melted to make polyester fabric, or used for energy (RDF) - if the material is non-recyclable and cannot be recycled.
- **New products** - when this is not possible, materials are turned into new products such as insulation, geotextiles, partition walls and sound boarding.

COMPLETELY SECURE?

When our clients hand over branded workwear they do so knowing that their brand and intellectual property are fully protected and secure. The HeathBrook SMARTRECYCLING service gives you total piece of mind.
